

Flower Pot Whale Craft

Things you'll need:

- A small flower pot
- Blue paint
- Blue construction paper or craft foam (same shade as the paint)
- Permanent Marker
- Googly eyes
- White pipe cleaners
- Clear or silver gems or sequins (optional)
- Scissors
- Tape
- Glue

Directions:

1. Paint the outside of the flower pot. Let dry.
2. Cut out fins and a tail for your whale. Glue on to the rim of the flower pot (shown below).
3. Draw a smile on the rim of the flower pot.
4. Glue the eyes to the flower pot.
5. Twist several pipe cleaners into a spiral, poke through the hole of the flower pot and secure to the inside with tape.
6. Optional: Glue sequins or gems to the pipe cleaners to imitate the shimmer of water.

*If you use craft foam instead of construction paper, these can sit outside in your garden!
